

Big Data: Storing, Moving, Mining, Visualizing

Things HiPACC Could be Leveraging

Topics

- Moving: CENIC @100G
- Storing: Data Oasis
- Mining: Gordon, Comet
- Visualizing: yt
- Sharing: SeedMe.org

California Has the Most Advanced Big Data Optical Network in the Nation

- 3,800+ miles of optical fiber
- **Members in all 58 counties connect via fiber-optic cable or leased circuits from telecom carriers**
- **Nearly 10,000 sites connect to CENIC**
- 10,000,000+ Californians use CENIC each day
- Governed by members on the segmental level

CENIC, Internet2, ESNet now connected at 100G

CENIC 2014 ANNUAL CONFERENCE

**WE NEED YOUR
FEEDBACK!**

Please leave
your comments
at the conference
survey today!

UCSD will be connected to CENIC and ESNet at 100G by end of 2014

NSF CC-NIE grant
PI: M. Norman

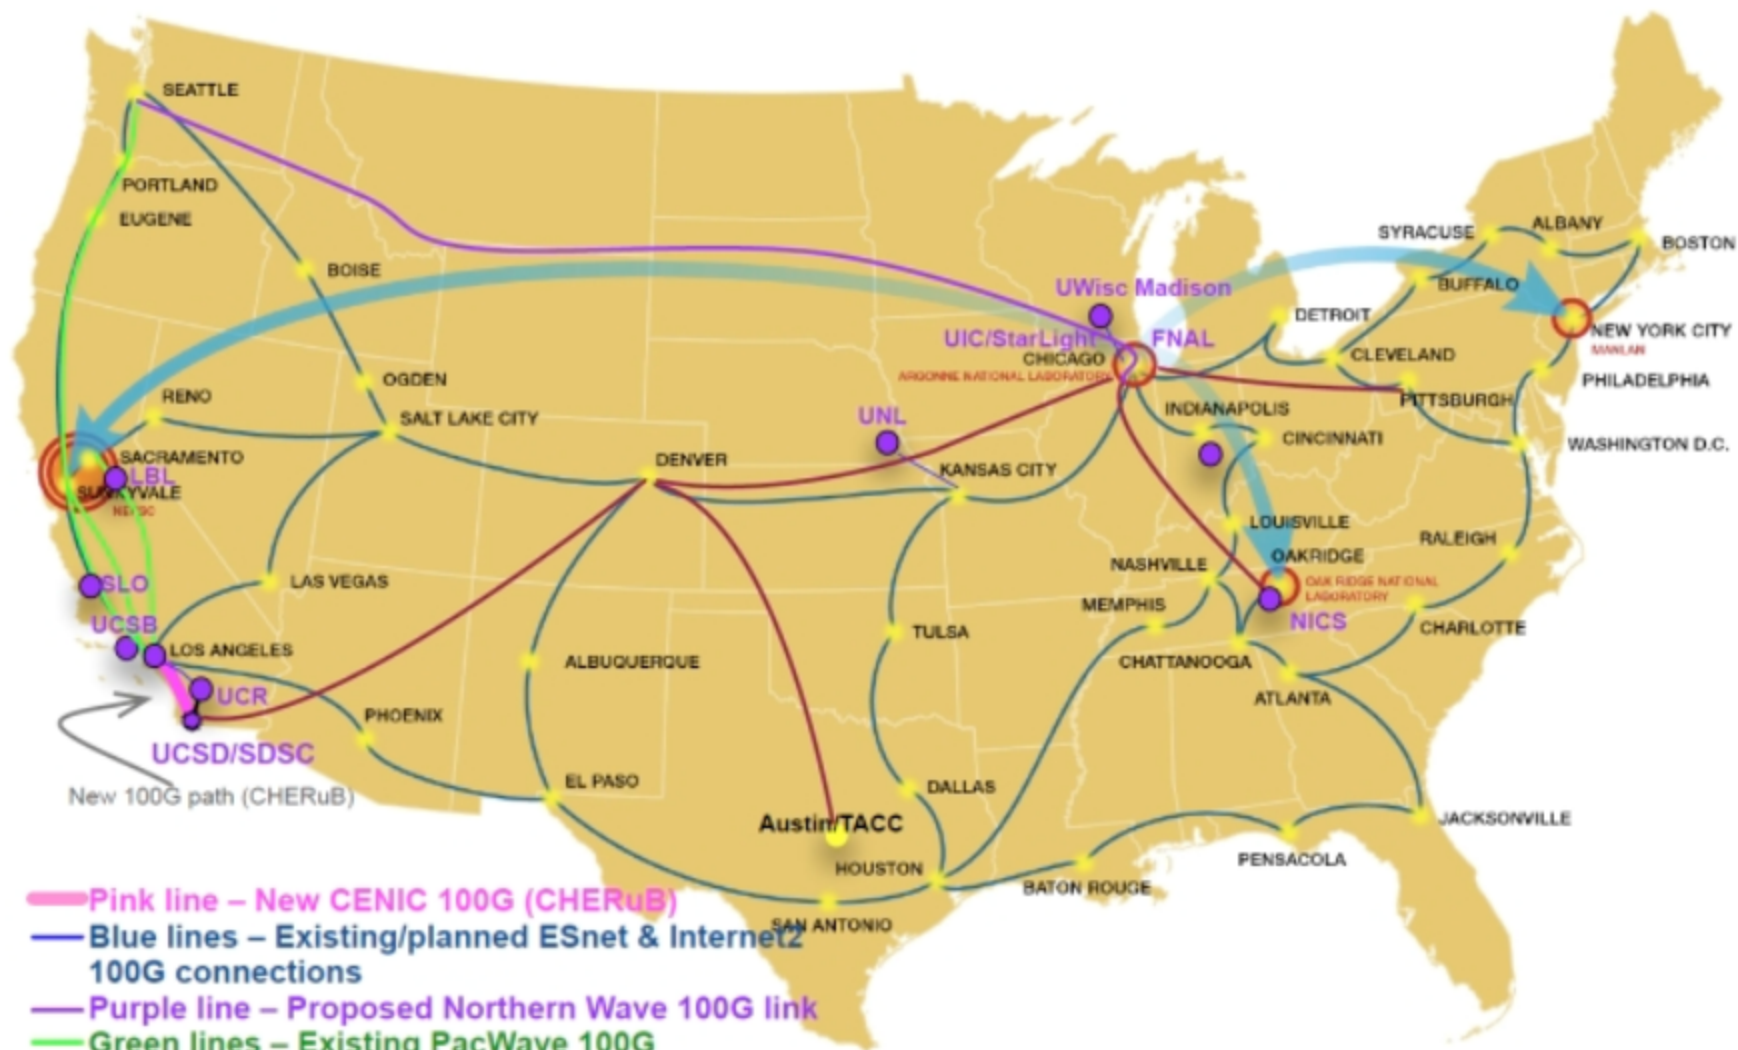

CHERuB

Configurable, High-speed, Extensible Research Bandwidth

CHERuB is bringing 100Gbps (Gigabit per second) data network connectivity to UCSD to accommodate big data and network research.

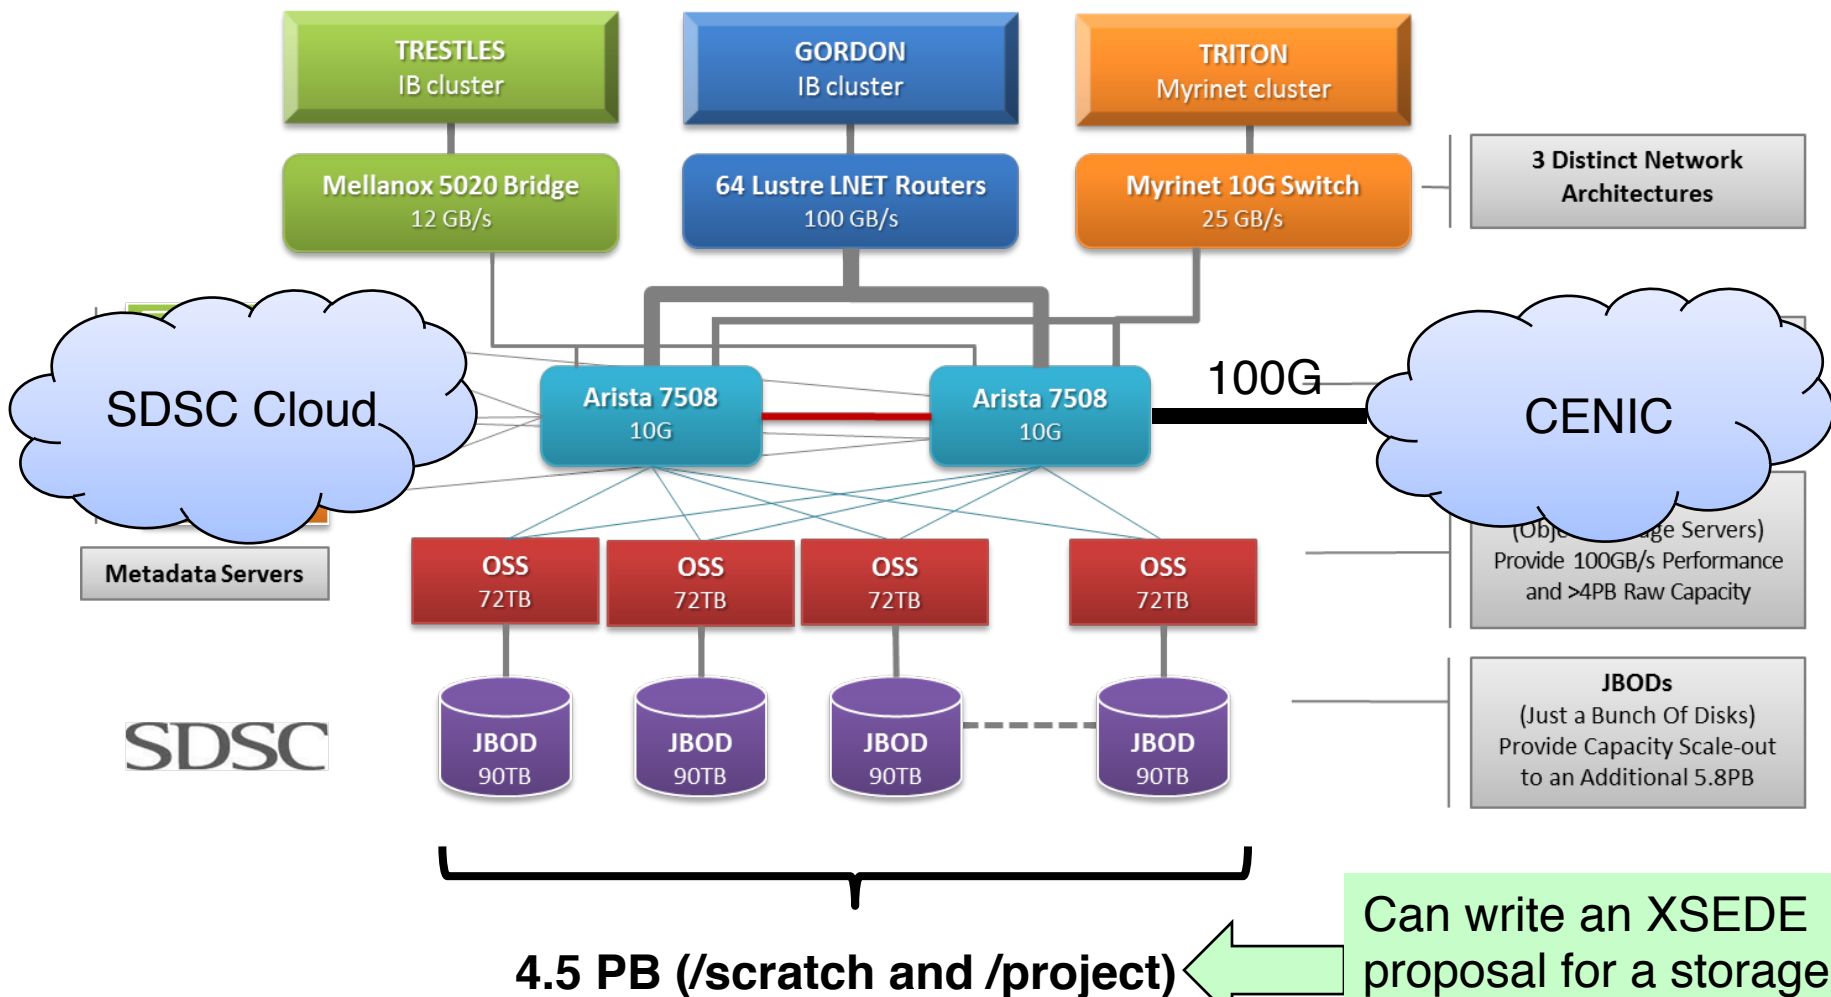

Other UC campuses with 100G connectivity

Campus	Connectivity	Date
UCLA	100G	Now
UCSC	100G	2014
UCD	100G	2015
UCB	100G	2015

- Pink line – New CENIC 100G (CHERuB)
- Blue lines – Existing/planned ESnet & Internet2 100G connections
- Purple line – Proposed Northern Wave 100G link
- Green lines – Existing PacWave 100G
- Maroon lines – XSEDE 10G network
- Black lines – Other existing 10-40G

Data Oasis Heterogeneous Architecture

Can write an XSEDE proposal for a storage allocation; e.g., /oasis/proj/hipacc

SDSC Cloud

<http://cloud.sdsc.edu>

OpenStack components

- **SWIFT object store**
- **NOVA compute**

Functionality

- **Easily locating research data (web accessible)**
- **Storage facilities that can hold huge datasets**
- **New web, compute servers with few clicks**
- **Publishing and sharing data**

Data Mining: Gordon Data-Intensive Supercomputer (XSEDE resource)

- First HPC system with flash SSD (300 TB)
- All I/O channels “maxed out” to accommodate Big Data movement
- Can “spin up” a SSD based Hadoop cluster from the batch queue for individual users
- Fore-runner to Catalyst system at LLNL

Comet supercomputer (2015) will support Big Data workflows for all fields of scholarship

CHALLENGES OUR PROPOSAL ADDRESSES

- ✓ Attract new users and communities
- ✓ Support diverse applications with complex workflows
- ✓ Ensure responsiveness for thousands of users
- ✓ Transfer, store, analyze, and share massive data sets
- ✓ Integrate with XSEDE

COMET COMPUTE SYSTEM

Cluster architecture

Fast standard nodes
Large-memory nodes
GPU-accelerated nodes
FDR InfiniBand

Storage architecture

Performance Storage
Durable Storage

Software

Science Gateways
Rich base of installed apps
Virtualization

USER & SYSTEM SUPPORT

New user orientation
XSEDE collaborations
FutureGrid

ALLOCATIONS & SCHEDULING

Optimized for throughput
Per-project allocation caps
Per-job core limits

2 PF compute
7 PB Lustre PFS
4.5 PB 2nd copy PFS
(old Data Oasis)

Sharing: SeedMe.org

- A new SaaS web service under development at SDSC
- Think of it as Flickr+YouTube for scientists

Simulation Progress

Collection ID Updated
5607 03/19/2014 - 00:02

Ticker	Timestamp▼	Interval
Void run (no LW background) reached z= 8.3.	3/19/14 - 0:19:47	10:7:10
Rarepeak (with LW background) reached z=15.6.	3/15/14 - 13:15:37	3:32:28
Normal region reached z=12.1.	3/15/14 - 10:15:09	7:34:50
Void run (no LW background) reached z= 8.4.	3/11/14 - 2:11:19	14:10:49
Rarepeak (with LW background) reached z=15.7.	3/10/14 - 12:10:30	0:7:58

Last 5 tickers, see all in Meta data.
